ZEBALLOS (PRIVATEER)

Tue. Aug. 14/01

- Newmex rep. - Adolf Aichmeier ^{Sunny + 28°C} + Norm Ewin
- + Jacques Houle + Kiernan Drumes (Cous - Narasim)
- Newmex (Calgary Co.) bought property in 1998
- Adolf says he spent ~ \$100K u/g
- this year (between #2 + #3 veins)
- also 'prelim' surface expl'n (soil geochem + grid)
- Newmex staked + bought other props. e.g.

u/g on 1100 Level - most mining took place above

Photos / Samples #2-3A Vein

arsenopyrite + py + ZnS + PbS + po + u/g in

qtz. (up to 2-3 gpt Au

cm to 1' wide veins

- in calc-sil. host (bio-gnt-ep.)

kd - need 8-10 faces working

Owner

East side of camp - Ed Skoda

(on behalf of CanAlaska (Harry Barr))

Photo: #3 Vein ('decline' - wood planks on water)

- done in 2000

Gold rec. ~ 40-50% w/p

- walk ~ 750 ft. from portal into shaft area. (photo-cable)
hoist

SCENARIO: past workings could be used for u/g drilling to test for parallel veins (cf. drifting 'blind')

- Heli-logging just above mine (+ elsewhere along slope, = great new exposures/access.)

Photos: High-grade V6 (incl. 'dendritic')

Photo: Look N across valley to old iron mine (scar)

Mill tour: ~ 60% of gold recovered from 'concentrate' produced via 2 large Wifley tables.

[mill looks 'rough': ~ 50 tpd?]

- little (mickey mouse) 'smelter' heater to produce gold in crucible cup.

Photo: Looking SSE up valley - Mount Zeballos mine - lower, higher

Photo - look W to Privateer

Photo: No. 1 vein, WHITE STAR (surface)

Photo: Look E up valley from No. 6 tunnel, PRIDEANT

Thurs. June 24/87

ZEBALLOS

(SPUD VALLEY)

Sunny 20°C

- with Andre P., Paul W., Mr. Lu, Kirk
- Dave Kayward - McAdam Res
- Spud Valley Mine (twice-Moia)
- \$1/m budget for '87 (~600,000 in '86)

Avg 14/01
Adopt (Private)
Spud Valley
~\$1.6M spent
on Spud Valley

- Banded gtz veins (narrow) in intrusive (6d)

Photo - #7 Level portal (lowest)
(to Goldfield vein) - right above old millsite

Photo - Sect. (high grab) of Goldfield
+ Spur veins

⇒ very narrow (<1") gtz. veinlet!

Photo - Looking NNW - core shack
+ Alderbridge iron (skarn) mine

- AT vein Look at core at core shack
- Best intersection 2.1 oz/t Au over 3ft.

also + Zn
+ Pt gtz
↓
wack

→ previously published 'reserves'
(i.e. 425,000 tons) are not
all mineable (max. 300,000 tons
@ 0.25 out Au)

- Locally good cockade,
drusy cavity-textures
