## INTERNATIONAL WAYSIDE GOLD MINES LTD.

[IWA-V] 17,634,291 SHS.

MORE CARIBOO ASSAYS RECEIVED - Frank Callaghan, president,  
reports consultant Dr.

Richard D. Hall, P.Eng., has advised International Wayside Gold Mines Ltd. of assay results on the remaining six underground percussion drill holes of a 24 hole program completed during 1998 on the 1200 level of the Cariboo Gold Quartz mine at Wells, about 100 km east of Quesnel, BC. SEE UNDERGROUND MAP OVERLEAF P.4. A total of 223 holes have been drilled by the company on Cow Mountain. An additional 147 surface holes were completed by previous operators between elevations of 4,000 and 4,900 feet on Cow Mountain. A mineral inventory calculation for Cow Mountain using the complete assay data base is in progress. Management believes an opportunity exists for a combined open pit and underground mining operation. Drilling in the BC Vein and Butts area continues. A selection of the results include:

Hole UP98-17 returned 24 feet grading 0.046 oz. gold/ton. Hole UP98-18 returned assays ranging from 0.030 to 0.078 oz. gold/ton between 4.0 and 200 feet with some barren sections. Hole UP98-19 returned 4.0 feet grading 0.805 oz. gold/ton. Hole UP98-20 returned 20 feet (48-68 ft) grading 0.093 oz. gold/ton. Hole UP98-21 had several high grade intersections; between 48 and 152 feet, high assays were cut to 0.50 oz. gold/ton - this intersection averaged 0.318 oz. gold/ton over 104 feet. Hole UP98-24 returned 1.321 oz. gold/ ton from 48 to 64 feet (16 ft). (SEE GCNL NO.214, 6Nov98, P.1 FOR PREVIOUS CARIBOO GOLD PROJECT DATA)
