Corp. and Carpenter Lake Resources have negotiated a \$2,300,000 exploration agreement with Chevron Canada Resources Ltd. on the

Wayside mine in the Bralorne-Gold Bridge area of SW B.C.
Chevron must spend the total amount to earn 51% interest. In announcing this, A.Chunick, president of Amazon and Carpenter Lake, says work is to start immediately upon approval of the agreement by regulatory authorities.

Amazon has been operator of the property for the past 3 years and interesting geological and drilling information has been obtained by Amazon's consultants.

Mr.Chunick presents some results of previous diamond drilling on the Wayside property. On the Commodore vein, just west of the Wayside Mine, 3 holes were drilled, see table. the A-5 hole is 60 feet east of A-1 and closer to the main mine. To corroborate the high values, a third hole was drilled close and parallel to hole A-5. A deep hole was drilled below the 9th level on the Wayside mine and, as well as the gold assay shown in the table, returned 1.02 oz.silver/t.

Chevron plans an extensive surface exploration program plus mapping underground of the nine levels of the past producing Wayside Mine.

The Amazon-Carpenter Lake Wayside Mine is surrounded by property on which the Levon-Veronex companies are now working underground. Manika Mining on the south east side of the property are now drilling with excellent gold values encountered.

MORE GOOD GOLD - Westmin Resources Limited, as operator, ASSAYS REPORTED reports additional diamond drill intersections on the 900 Zone at the Debbie project, 10 miles east of Port Alberni on Vancouver Island, B.C. The central intersection in DN50 was previously reported. Property interests are Westmin 50%, Angle Resources Ltd. 25% and Nexus Resources Corporation 25%. This report completes the significant results from the 900 Zone drill program which was concluded at the end of February. A further drill program is planned.

Exploration plans for 1987 include diamond drilling of 4,000 feet and a decline of 700 feet to obtain a 5,000-ton bulk sample from the Lambert vein. Ore obtained from exploration will be stockpiled for transportation to a pilot mill at Terra Mines' Bullmoose Lake property in early 1988. Mr Evans expects the bulk sample to contain sufficient gold to generate a positive cash flow on the project.

Dyna Gold Resources Inc. has been unable to complete the work required to earn 25% interest in the Dome Lake properties and the pertinent agreement has been cancelled.

NIM and Company, Limited Partnership 1987 has committed \$239,000 on a private placement basis, for expenditure on Lightning's Dome Lake property for which Lightning will issue tax flow-through common shares, subject to regulatory approval.

CACTUS NEST EXPLORATIONS LTD. (CNE-V)

**DRILLING WILL START IN A FEW- Gold showings on the Lupus
DAYS ON MT. WASHINGTON CLAIMS** property on Mt. Washington,
15 miles west of Comox,

Vancouver Island, B.C., will be tested by diamond drilling starting in a few days. The property is owned 50% by Cactus Nest, 35% by PanWorld Ventures and 15% by Pro Quest. The drill program is designed to test the significant gold mineralization exposed in numerous trenches on the Lake and Creek zones. The Lake zone has yielded a composite rock chip sample assaying 0.415 oz. gold, 1.76 oz. silver/t, 1.75% zinc across 1.41 meters; and a second sample assaying 0.357 oz. gold/t, 2.01 oz. silver/t, 2.86% zinc across 2 meters. A coincident soil and induced polarization anomaly suggests a 1,500-foot length to the zone.

The Creek zone is poorly exposed along a strike length of 800 feet in a steep creek gully. Mineralization is reflected in soil samples by a double, en echelon, gold, arsenic geochemical anomaly with a length of 2000 feet. A limited geophysical induced polarization survey of the Creek zone tends to confirm the presence of two en echelon zones of mineralization.

Fourteen grab samples taken over 1,000 feet of the poorly exposed creek showing range from 0.062 oz. gold/t to 0.46 oz. gold/t.

LONGREACH RESOURCES LTD. (LLR-V)

**NEW GOLD PROJECT OPTIONED. PLATINUM - First 1987 work on
PROGRAM STARTED FOR 1987** the recently optioned Paydirt property is designed to confirm and extend reserves calculated at a minimum of 200,000 tons grading 0.17 oz. gold per ton. A successful surface diamond drilling program is expected to permit the start of underground exploration toward the end of 1987.

Longreach Resources has acquired an option to earn a 50% interest in Paydirt claim group on Galore Creek, Stikine River area, northwestern B.C. from **CONSOLIDATED SILVER STANDARD MINES LTD. (CDS-V)** To acquire the interest, Longreach is to spend a minimum of \$320,000 in 1987, subject to regulatory approvals. The property was staked in the 1950's as a copper prospect and recently has been recognized for its gold production potential.

The property program will include detailed diamond drilling to confirm and extend the reserves. Work will be under the direction of Marl Cloutier, who did the early prospecting on the the Skyline property located 35 miles to the south of the Paydirt. The Cloutier zone on the Skyline property is named in his honor. Don Omrod, who contracted the Serem tunnel in the Toodoggone River area, B.C., and who most recently worked as a supervisor on the C.P.R. Selkirk railway tunnel project, will also be employed on the Paydirt program.

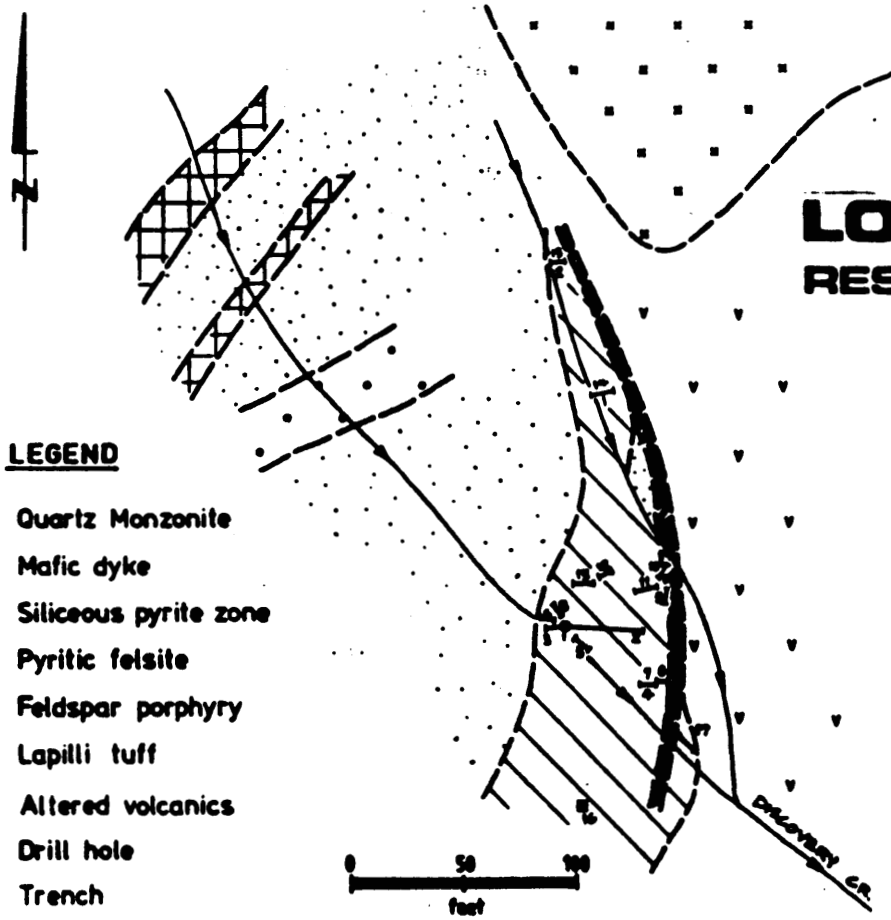

Placer Development Limited, as contractor and option holder, has started line cutting of a 175 km grid on the Platinum Blonde property, 40 miles north of Grand Forks, B.C. The program will include geophysical, geochemical surveys and trenching followed by definitive diamond drilling on known platinum group metal targets and new targets located in the current work.

Longreach has adequate funds for the current program and is continuing negotiations for additional financing.

A.R.C. Potter has resigned as a director due to other work commitments. He will continue to assist the company in an advisory capacity. The board of Longreach wishes to thank Mr. Potter for his valued service through the last three years.
