-----' drill results from
the surface drilling program at the Polaris Taku project
60 km east of Juneau, Alaska in northwest B.C. Suntac
Minerals may earn a 60% interest from Rembrandt Gold
Mines Ltd. by spending \$3,000,000 on the property over 5
years. The intersections in the table are from the old
mine workings but are outside of the calculated ore
reserve on the project. Numerous targets of this nature
exist on all mine levels and further drilling will
continue to follow up on these zones. (SEE GCNL NO.228,
P.1, Nov.27,1988 FOR PREVIOUS DRILL RESULTS).
