TENAJON RESOURCES CORP. (TJS-V)

TENAJON ACQUIRES ESSO'S- Tenajon Resources Corp. has 50% INTEREST IN SB PROPERTY completed the acquisition from Esso Minerals Canada of their 50% interest in the SB (Silver Butte) property for \$2,144,582. The company now holds a 100% interest in the property, subject to a 20% net proceeds interest to CONSOLIDATED SILVER BUTTE MINES LTD. (CSB-V). The Kansas claim, which is not subject to this net proceeds interest, is host to most of the known mineralization on the property and will be the focus of the majority of the 1989 exploration program.

The property is located 15 miles north of Stewart and lies between Westmin's Big Missouri and Silbak Premier precious-base metals properties which have recently started production on a tune-up basis.

Four known zones of mineralization have been identified to date on the property. Probable and possible reserves have been calculated for two of the zones and total 308,000 tons with an average grade (uncut) of 0.505 oz. gold/ton and 1/07 oz. silver/t. Both zones are open in at least two directions.

The 1989 exploration program started in late April. To date, the adit has been extended 250 feet and three drill stations cut. A 2,800 foot, 9 hole underground diamond drilling program has started and will test the "35" zone, the Anomaly zone and the West Kansas zone. A minimum 10,000 foot surface diamond drilling program on the Kansas zone is scheduled to start within two weeks. The company has sufficient funds to complete the program.
