REDFERN RESOURCES LTD. (RFR-T)

COMINCO LTD. (CLT-V,T,M)

MASSIVE SULPHIDE STEP-OUT - J. Michael Kenyon, secretary,  
reports Redfern Resources  
Ltd., 40%, and joint venture partner Cominco, Ltd., 60%,  
have had drill hole 23 delayed by mechanical difficulties  
on the Tulsequah Chief project located in northwest B.C.,  
about 40 miles east of Juneau, Alaska. It does, however,  
appear to have passed through the mineral horizon coring  
86.5 feet, or 65 feet true width, of well-mineralized  
massive sulphide from 2,088 -2,174.5 feet. This intercept  
is in the same section as hole 22 and represents a  
500-foot down-dip step-out. The second drill rig is not  
expected to start drilling for several days, but with  
two machines, the program will proceed more rapidly.
