MAY 17, 1991

INTERNATIONAL KENGATE VENTURES INC. (IKV-V)

BULK SAMPLES ASSAYS RECEIVED - Dan Clark, president, reports International Kengate Ventures Inc. has received assays from a 200-pound sample taken from underground on the East portion of the No.2 vein of the Rocher de Boule mine located about 60 miles northwest of Smithers, B.C. The company can earn a 100% interest by paying \$120,000, issuing 100,000 shares and spending \$600,000 on exploration over five years, subject to a 4% net smelter return royalty.

SAMPLE NO.	WIDTH FEET	GOLD OZ/T	SILVER OZ/TOM	COPPER %	GROSS VALUE	GOLD EQUIV.
1100 SL1	5.0	0.135	9.2	4.76	\$217/T	0.52
1100 SLCA*	5.0	.135	9.3	4.76	217	.52
1100 SL2	5.0	.42	15.0	8..32	451	1.07
1100 SLCA*	5.0	.42	17.0	8.08	454	1.08
1100 SL3	5.0	.07	15.0	2.60	160	.38
1100 SLCA*	5.0	.07	15.1	2.60	160	.38
1000 L4	3.0	.055	2.4	6.00	184	.44
1000 LCA*	<u>3.0</u>	<u>.055</u>	<u>2.27</u>	<u>5.92</u>	<u>182</u>	<u>.44</u>
AVERAGES:	4.5	0.17	10.66	5.38	\$253/T	0.60

* = Check Assay

In addition, the metallurgical tests completed on the sample to assess flotation and mill compatibility in a custom mill in northwest B.C. was positive. Further tests are under consideration. (SEE GCNL No.77, 22Apr91, P.3 FOR PREVIOUS INFORMATION)
