George Cross News Letter

"Reliable Reporting"

WESTMIN RESOURCES LTD. (WMI-T,M,V)

HOLE 14-731, SEC. 16+92E INCLINED -65°, 160° AZIMUTH

INTERVAL METERS	LENGTH METERS	GOLD G/TONNE	SILVER G/TONNE	COPPER %	LEAD %	ZINC %
305.0-315.6	10.6	1.7	21.4	1.5	15.0	18.2

Westmin Resources Ltd. has reported it has obtained assay confirmation of the ore intersection announced on 24Aug92. The hole is particularly encouraging because it extends the Battle ore 30 metres east of the section and because the ore intersection was diluted by more than 20% dyke material - meaning the ore grade would have been higher. (SEE GCNL NO. 165, P. 1, 26AUG92).

SWANNELL MINERALS CORP. (SNL-V)

FOLLOW UP EXPLORATION PLANNED - Stan Ford, president of Swannell Minerals has reported results from the sixth and seventh of seven initial exploration programs in the Johanson Lake area, 200 miles north of Smithers, B.C. The Pal claim soil sampling identified two anomalous areas of copper
