RANDBURG GOLD CORP. (RGZ-V)

GWD RESOURCE CORP. (GMD-V)

COPPER CAMP CLAIMS INTEREST ACQUIRED - Jeff Clachurski, president, reports

Randsburg Gold Corp. has agreed to acquire a 50% interest in the Copper Camp claims located near Greenwood, south-central B.C. from GWD Resource Corp. for 100,000 shares, subject to regulatory approval. Randsburg has received from Minnova Inc. drill logs from the 1991/1992 drill programs. Below are the more significant results:

- TM 91-14...anomalous copper over 400 feet
- TM 91-15...anomalous copper over 501 feet including 142 ft of 0.1% copper, and similar values in other holes.
- TM 92-40...2.62 feet grading 0.1% copper
- TM 92-41...1.97 feet grading 0.09 oz.gold/ton and 4.26 feet grading 0.45 oz.gold/ton
- TM 92-42...11.15 feet grading 0.049 oz.gold/ton and 9.84 feet grading 0.027 oz.gold/ton

Drill hole TM 92-41 was drilled to test the northwest extension of the Wild Rose vein.

Randsburg has begun its four-hole drill program on the nearby Wild Rose claims under the supervision of Minnova. Originally the company planned to drill 10 holes averaging 250 feet per hole, but the work program by Minnova indicated four main targets identified by intense silification and coincidental gold soil geochemistry. These four holes averaged 738 feet in depth for a total of 2,952 feet of drilling. By December 18, two holes were completed and hole No.3 is underway. It is expected drilling will be completed by month-end. Minnova can earn a 70% interest in the Wild Rose claims. (SEE GCNL No.235, 7Dec92, P.2 FOR PREVIOUS PROJECT DETAILS)
