WESTMIN RESOURCES LTD. (WMI-V,T,M)

Interval	Length	Gold	Silver	Copper	Lead	Zinc
<u>Meters</u>	<u>Meters</u>	<u>G/Tonne</u>	<u>G/Tonne</u>	<u>%</u>	<u>%</u>	<u>%</u>
189.7-192.0	2.3	0.6	17.0	1.8	0.1	7.6
271.3-272.7	1.4	1.2	45.5	3.6	2.5	22.4

Westmin Resources has reported assay results from hole 14-728 completed on Section 16+92E at the Battle Lake mine, 40 miles west of Campbell River, Vancouver Island, B.C. The upper ore zone is geologically similar to Gap Zone mineralization. The lower zone is a "sliver" of Battle Zone mineralization which is fault bounded above and below.

The first hole on Section 17+98E has now been completed without intersecting ore grade mineralization at the Battle Zone horizon. The geology was very similar to the western sections but the mineralization was weak stringer zone material.
