TENAJON RESOURCES CORP. [TJS-V]

WESTMIN RESOURCES LTD. [WMI-V,T,M]

S.B. PROJECT REPORT - Tenajon Resources Corp., a member of the Northair group of companies, has reported the 1993 exploration program on the S.B. property, located 30 km by road north of Stewart, B.C., has been completed. The property is a 50/50 joint venture with Westmin Resources Ltd., the operator.

A total of 283 metres of drifting and raising were completed to test about 50 metres of strike of the Kansas/West Kansas Zone. The underground development was driven primarily to provide access for diamond drilling. An aggregate 2,647 dry tonnes of this material was milled in two batches through the adjacent Westmin Premier mill. A total 256 ounces of gold were recovered from the test milling, or about 20% higher than predicted by underground sampling. The net revenue from the first mill run was \$11,070, while the estimated net revenue for the second mill is about \$21,392.

Underground drilling of 85 holes totalling 1,967.5 metres was completed from two sublevels within the zone. The drilling has shown a large low grade mineralized area with numerous high grade drill intersections. A thorough review of the drill data must be carried out

~~LIDIANI~~
before the potential economics of the zone can be established. (SEE GCNL NO.161, 23Aug93, P.1 FOR PREVIOUS PROJECT DETAILS)
