TECK CORP.

[TEK-V, T, M] 85,433,539 SHS.

RAINBOW ASSAYS RECEIVED - James T. Gillis, president, Getchell Resources Inc., 30%, reports joint venture partner Teck Corp., 70%, has received initial assays for drill hole 94-21 on the Rainbow property near Kamloops, B.C. Hole 94-21 is collared 50 metres southeast of previously reported holes 94-14 and 94-17, and is drilled along the same azimuth.

HOLE NO.	INTERVAL METRES	LENGTH METRES	COPPER %
94-21	187.7 - 311.2	123.5	0.5
Incl.	216.0 - 261.4	45.4	.8

Assays for holes 94-14, 17 and 21 indicate mineralization extends beyond the depth of current drill testing. Teck and Getchell will test deeper levels of the zone with the next phase of drilling. Gold grades associated with the copper mineralized intervals are commonly in the range of 0.15 to 0.3 grams/tonne. Assays for hole 94-22 should be available by October 14. There is a 2% NSR on the property owned by Deak Resources, half of which may be purchased by Teck for \$500,000. (SEE GCNL NO.193, Oct.7/94, P.1 FOR PREVIOUS PROJECT DETAILS AND MAPS)
